## XLP Fuel Additive

XLP Fuel Additive is a premium grade "deposit control" additive which combines the powerful benefits of premium gasoline detergent and a friction modifier. These two ingredients provide a performance boosting aftermarket additive -- beginning the first time it is used.

Created by MidContinental Chemical (MCC), XLP's proprietary formulation was created in 2006 and distributed exclusively through one of the "TOP 5" largest direct selling companies in the world.

Literally, hundreds of thousands of bottles have been sold to satisfied customers all across the United States.

Now, XLP Fuel Additives are available to ever driver in America. Overall benefits include; Can improved Gas Mileage, Control Deposit, Keep engines clean, with no

harmful effects.

## XLP Fuel Additives: Gasoline

### XLP Fuel Additives

Translate

Powered by Google Translate

XLP Gasoline Additive \$19.95

XLP Diesel \$69.95

XLP Diesel 55 Gal Drum \$2,595

Why did MCC chose to blend a cleanser and friction reducer as the main ingredients of XLP?

The Clean Air Act mandates that all gasoline be treated with detergent to reduce emissions into the atmosphere. These minimum levels of detergents may not prevent the formation of deposits on fuel injectors, carburetors and intake valves.

Harmful effects of deposits in the Carburetor and Fuel Injectors cause hesitation and stumbling, higher emissions of Hydrocarbons and carbon monoxide, lower fuel economy and lower power output. In regard to the intake valves, deposits cause hesitation, higher emissions and lower power output.

Therefore, performance benefits of deposit control additives can: provide excellent port fuel injector deposit cleanup and keep-clean performance, provide excellent injection valve deposit cleanup and keep-clean performance and have no detrimental side effects. However, since everyone drives cars that vary in model, age and consistency of maintenance, it becomes difficult to predict your exact results. Therefore, MCC can only provide general results that "Can Occur" and you'll have to provide the specific.

Now, lets discuss the second ingredient, the friction modifier. You can get both immediate and long-term benefits from the friction modifier. Immediate benefits include an improvement in fuel economy and the

reduction of internal friction in the engine. Used over the long haul, it can improve or restore fuel efficiency of the engine oil. Using a common industry standard test, XLP showed the residual effect of friction modifiers that accumulate in the oil crankcase with continued use of this product. This is achieved from wall wetting and accumulation in crankcase oil.

Advantages can include: Restoration of lost power, improved acceleration, smoothed out rough idling, increased fuel economy, elimination of intake valve sticking, excellent protection against corrosion, used in new and old engines with no detrimental side effects.

**Initial (clean-up) treatment rate: 4.5 ounces per 15 gallons of gas:** 4.5 ounces per 15 gallons of gasoline clean up treatment can: increase fuel economy in the first tankful, restore lost power, improve acceleration and clean up injectors, intake valves, intake ports and intake manifold.

**Ongoing (keep clean) treatment rate: 1.5 ounces per 15 gallons of gas:** 1.5 ounces per 15 gallons can: maintain fuel economy, will keep intake valves clean and will clean up port fuel injectors, carburetor and intake manifold. Packaged 16 ounces per bottle.

**Suggested Retail:**

|                          |          |
|--------------------------|----------|
| 1 each 15 oz. bottle @   | 21.95    |
| 4 each 15 oz. bottles @  | 79.95    |
| 10 each 15 oz. bottles @ | 149.95   |
| 1 each 55 gallon drum @  | 1,995.95 |

## XLP Fuel Additives: Diesel

MidContinental Chemical has formulated a premium Diesel additive package that combines the powerful benefits of patented cleansing technology with other diesel additive components.

MCC has added lubricity improvers, corrosion inhibitors, stabilizers, and winter operability additives such as cold flow improvers and deicers to provide a performance boosting additive beginning with the very first use.

### XLP Diesel for Agriculture I

Why a Diesel fuel detergent? To help maintain cleanliness of the fuel pump and component parts, helps to prevent fouling and deposit formation on the fuel injector nozzles, to control acid initiated corrosion and
